

HOW MUCH DOES IT COST TO CHARTER A YACHT?

- Prices vary whether it's a powerboat or sailboat and size of the boat

38' Sailboats start at \$625 for 4-hour charter and 28' powerboats start at \$650 for 4-hour charter

- Captain are an additional cost not included in the yacht charter price

Captain costs range from \$350 to \$450 as they charge different amounts for this service

- There is a small fee for cleaning and fuel

Power boats use more fuel but you have a bit more room and can get around the Bay faster. They move flat on the water.

Sailboats use much less fuel and move across the bay with the wind. We have monohulls and multihulls. Call us to discuss the difference.
